# WHICH KIND OF VISION

It is curious but true, that the only money that most people are interested in is the money they cannot see. Distance lends enchantment to the view. They have a long distance vision which is forever looking over the world for opportunities and forever overlooking a world of opportunities

The greatest vision of all is the ability to recognize the investment opportunities at your own doorstep. One of these opportunities is PRU-DENCE-BONDS, paying 6%, guaranteed as to interest and principal, and backed by conservative mortgages on income-producing real estate

## A SAFE INVESTMENT YIELDING REMARKABLE PROFITS

A company whose products are widely used and are shipped in carload lots offers a small issue of its 8% preferred stock, with a bonus to the purchasers of an equal amount of its common stock.

The company's profits are so large that it will retire the preferred stock at an early date from its surplus earnings after paying dividends. The investors will thus get back their money plus dividends; and the common stock, which they will still own, will have large earnings because of the company's small capitalization.
